

Akeem Chambers

Software Engineer

About Me

As a software engineer, I bring the heart of a creative to every project, not just to find solutions, but to build them with innovation, imagination, and ingenuity.

Experiences

February – June 2023

Resilient Coders

SOFTWARE ENGINEER

- Designed and developed full stack web applications using HTML, CSS and JavaScript
- Worked with/in teams of software engineers and designers to train, peer review and build applications

November 2022 – February 2023

Granite Telecommunications

PROJECT COORDINATOR

- Create and update trackers to show the progress of the project
- Working on cross-product and cross-department projects, assisting on the behind the scenes work to support the project managers in completing various internal and external projects
